

ROADHEADER EBZ120

Ž

Remote Control

Wireless and wired integration allows control over distances of up to 500m.

Compact Structure

Small and agile body design enables flexible operation and easy component replacement.

Fault Alarm System

Automated fault detection for rapid troubleshooting.

Reliable Design

Durable cutting and travel reducers with a service life of up to 5,000 hours.

3D modeling and advance layout design enhance cutting performance.

Specification	Value
Maximum Cutting Height	3780mm
Maximum Cutting Width	5000mm
Excavated Cross-Section Shape	Any
Economic Excavation Profile	7~21m²
Gradeability	±16°
Travel Speed	0~3.7 m/min
Average Ground Pressure	0.135 MPa
Uniaxial Compressive Strength of Coal and Rock	≤60 MPa
Overall Dimensions (L×W×H)	8780×2125×1714 mm
Machine Width	2125mm
Shovel Blade Width	2500mm
Clearance Height	1950mm
Clearance Width	2600mm
Minimum Working Height	2000mm
Minimum Working Width	2800mm
Maximum Size of Undetachable Parts	2965×1336×1305mm
Maximum Weight of Monolithic Component	3.5t
Width of First Conveyor	510mm
Container Specifications	40-foot Frame Container + 40-foot Open Top Container
Gantry Height	350mm
Installed Power	210kW
Cutting Power	120kW
Pump Station Power	90kW
Machine Weight	36t
Cutter Head Type	Longitudinal Axis
Internal Spraying	Optional
External Spraying	Standard
Supply Voltage	AC 1140V
Power Frequency	50Hz
Remote Control	Optional

Project Cases

Mar. 2012
Shanxi, China - Lanxing Coal Industry EBH120

The continuous cutting and rapid mucking capabilities of EBH120 significantly shortened the support cycle and reduced overall operational costs.

Apr. 2014 Sichuan, China - Panlong Village Project EBZ90

In humid environments, EBZ90 continues to operate stably. Its centralized lubrication system extends the lifespan of key components, ensuring strong continuity inoperation.

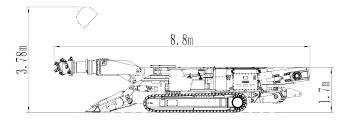

Sep. 2019Morocco - Casablanca Hydraulic Engineering ProjectEBH120

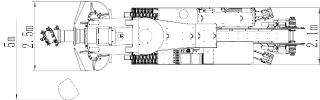

The compact design of EBH120 enabled flexible maneuverability in confined spaces and uneven terrains while maintaining precise cutting accuracy, ensuring timely project completion.

Venezuela - Infrastructure Project

EBZ90+EBH160

EBZ90 and EBH160 were selected for a coal mine infrastructure project in Venezuela. These machines are planned for roadway excavation and supporting construction operations.
